

IRON PLEX™

DESCRIPTION:

An oral preparation containing Biovet's unique and exclusive form of iron, known as Polysaccharide Iron Complex, together with amino acids (proteins), vitamins and minerals. This formulation is an oral iron-amino acid supplement for horses.

BENEFITS:

Iron Plex™ uses an iron called Polysaccharide Iron Complex (P.I.C.), which in itself, is totally meaningless unless reduced to its features, advantages and benefits to the trainer. This form of iron is tasteless, odorless and produces the highest percent of elemental iron of any we have come in contact with. A high elemental iron yield in a totally absorbable form means that more basic elemental iron is absorbed into the blood stream resulting in a faster buildup of red blood cells and hemoglobin, thus a greater oxygen carrying capacity of the blood. Finally, P.I.C. will not cause intestinal irritation resulting in colic, as some iron products are prone to do. This means that the horse does not go off feed or lose essential nutrients.

It is essential to replace folate lost in the sweat and urine. Iron Plex™ contains folic acid to meet these losses and bring these requirements up to normal. Also, it contains no prohibitive substances and may be used during racing and competition. Adding Iron Plex™ to the feed of horses for 3 days before a race or an event is a convenient and practical way to administer these factors, such as iron, which are often included in pre-race injectable programs.

GUARANTEED ANALYSIS:

Each single 1 ounce packet contains:

Ascorbic Acid	500 mg.
B12	150 mcg.
Riboflavin.....	25 mg.
Pyridoxine Hydrochloride.....	10 mg.
Folic Acid.....	1.5 mg.
Niacinamide.....	300 mg.
D-Cal Pantothenate	20mg.
Iron.....	3500 PPM
Copper.....	1400 PPM
Choline Chloride.....	50 mg.
Biotin.....	10 mcg.
Inositol	50 mg.
DL-Methionine.....	50 mg.
Lysine	150 mg.
Glycine.....	50 mg.

INGREDIENTS: Soy Protein Concentrate, Dextrose, Ascorbic Acid, Niacinamide, Polysaccharide Fe Complex, Glycine, L-Lysine, DL-Methionine, Butterscotch Flavoring, Copper Sulfate, Choline Chloride, Riboflavin, Pyridoxine, D-Calcium Pantothenate, Biotin, Cyanocobalamin, Folic Acid, Inositol.

NET CONTENTS1 ounce (28.4 grams)

DIRECTIONS:

Maintenance: Feed 1 packet every other day or every third day.

Racing or eventing: Feed 1 packet daily for three days prior to strenuous activity.

Consult your Veterinarian for recommendations other than the above. For best results, mix contents with horse's feed.

FOR EQUINE USE ONLY. KEEP OUT OF REACH OF CHILDREN.

*TARGET USE:

*All Horses in Competition

*New Born Foals

PACKAGING:

30 / 1 oz. packets per bucket; 4 bucket/case

90 oz. / with 1oz. measure

450 oz. / with 1 oz. measure
