

LIGHTNING™

DESCRIPTION:

Biovet LIGHTNING is a hair coat and skin conditioner for horses. Also, it contains no prohibited substances and may be used during racing and competition.

BENEFITS:

Biovet LIGHTNING contains concentrated polyunsaturated fatty acids and essential fatty acids, along with Vitamin E, A, B Complex and amino acids. This product is uniformly successful in promoting a soft, shiny, glossy hair-coat in otherwise normal horses. This product is especially useful in preparing young animals for sales or halter classes, because it will provide maximum sheen to the hair coat. If no noticeable change has occurred within three to four weeks after the administration of LIGHTNING on a daily basis, you should consult your veterinarian, because it is likely that some underlying disease process is preventing the development of normal hair growth.

LIGHTNING is a highly concentrated supplement containing 64% polyunsaturated fatty acids and other nutrients helpful to skin and coat conditioning. LIGHTNING also contains flavoring agents which make the formula highly palatable and can be top-dressed or mixed into daily rations. If fed more than once a day, it is recommended that you split the dosage between the feedings.

GUARANTEED ANALYSIS:

Each one (1) fluid ounce contains:

| | |
|-----------------------------------|-----------|
| Polyunsaturated Fatty Acids | 64% |
| Linoleic Acid | 12,500 mg |
