

## NATURAL E™

*With Digestin™ & Natural Selenium*

For horses where high levels of Vitamin E are indicated. Each dose packet contains 3000 International Units of Natural Vitamin E. This product is indicated where dietary intake is reduced or body requirements for Vitamin E are increased. A deficiency of Vitamin E may occur when horses are fed poor quality food and may not be readily detected.

### **BENEFITS:**

Natural E™ is also indicated where body requirements are increased due to the inability of the intestinal tract and enzyme to properly absorb and transport Vitamin E across the intestinal wall. It is also indicated during certain types of high stress situations, particularly during the breeding season on stallions, or in horses that are "nervous".

Natural E™ contains no prohibited substances and may be used during racing and in competition.

### **GUARANTEED ANALYSIS:**

Each single 1 ounce packet contains:

Vitamin E ..... 3,000 I.U.  
Digestin™ (Lactobacillus Acidophilus, Lactobacillus Plantarum, Lactobacillus Casei,
